felix.moenckemeyer@gmail.com · +41 78 844 2300 · Zürich, Switzerland

Highly motivated **Software Engineer** (GenAI, Agentic & Cloud) with a strong interest in complex problems. 7+ years building production software from machine to cloud, the last years as a **Forward Deployed Engineer** delivering GenAI, RAG and agentic solutions embedded in enterprise customer teams — from architecture to production handoff.

"I want to build trusted, reliable systems that solve meaningful problems."

EXPERIENCES

- **Microsoft · Industry Solutions Engineering (ISE)**
Forward Deployed Software Engineer - Zürich
Building production-grade GenAI, agentic and Azure cloud solutions embedded in enterprise customer teams.
 - Agentic dev pipeline from Figma to merged PR: 62 Copilot-merged PRs.
 - Production RAG / AI Search; 8x faster indexing at 100k+ scale.
 - Edge workflow engine benchmarked at ~9,000 wps (10x improvement).
 - Across engagements: customer enablement, mentoring & open-source samples.*Since July 2022*
- **vivenu GmbH**
Backend Developer
Delivering a [reliable, scalable and simple](#) ticketing experience for our API-First customers.
September 2021 - June 2022
- **Senseering GmbH**

Working Student - Aachen
Collecting PLC and sensor data for an internal research data library via an institute-wide MQTT server.
April 2018 - April 2020

EDUCATION

- **B.Sc. Computer Science**
RWTH Aachen University
Fall 2014 - Fall 2018

SKILLS

- **Programming**
Python, C# / .NET, TypeScript
- **AI & Agentic Systems**
RAG, Azure AI Search, agentic workflows, GitHub Copilot, MCP, Azure Durable Functions, LLM evaluation
- **Cloud & Data**
Azure cloud architecture, Functions, Container Apps, App Service, Static Web Apps, Microsoft Fabric, Synapse, Databricks
- **Engineering**
CI/CD, DevContainers, Bicep, azd, Entra ID, OpenTelemetry, Playwright, load testing, ADRs
- **Languages**
German (native), English (fluent)

PROJECTS

- **Indexadillo** [\[GitHub\]](#)
Open-source sample for large-scale parallel document indexing with Azure Durable Functions. Published to Azure-Samples, Microsoft Learn & AZD Awesome.
Azure, Durable Functions, RAG, Open Source
- **Build Your ETF** [\[App\]](#)
Web app that optimizes ETF portfolio combinations with OR-Tools to match country and industry allocation preferences.
OR-Tools, Optimization, TypeScript, Finance
- **RehPublic** [\[App\]](#)
AI-powered camera-trap platform that automatically detects and maps wildlife for biodiversity monitoring.
AI, Computer Vision, Python, Geospatial
- **Hallucination News** [\[Site\]](#)
Agentic system that monitors RSS feeds, fact-checks articles with real-time web research, and publishes verified analysis.
GenAI, RAG, Agents, Astro
